Executive Summary

Summary of key metrics and performance indicators for April 2026. Overall performance was strong across all segments, with revenue growth accelerating and customer satisfaction metrics trending positively.

Revenue Analysis

Total revenue grew 12.3% quarter-over-quarter, driven by enterprise subscription upgrades and the launch of the analytics add-on. All three segments posted double-digit growth.

Category	Q1	Q2	Change
Enterprise	$1.2M	$1.4M	+16.7%
SMB	$800K	$890K	+11.3%
Self-Serve	$340K	$380K	+11.8%

Customer Metrics

Net revenue retention improved to 128%, indicating strong expansion within existing accounts. Churn decreased to 2.1% (from 2.8% in Q1), the lowest rate in company history.

Risk Assessment

Supply chain dependencies remain the top operational risk. Mitigation: vendor diversification program launched in March with three additional logistics partners onboarded. Secondary risks include regulatory changes in EU markets and key-person dependency on the engineering lead.

Recommendations

1. Expand the analytics add-on to mid-market tiers by Q3.
2. Invest in onboarding automation to sustain churn reduction.
3. Pilot usage-based pricing for the self-serve segment.
4. Hire a dedicated regulatory compliance officer for EU operations.
